

Tech Sheet: McDonnell Douglas MDD 520 Notar

(mcdonnell-douglas-520.pdf)

McDonnell Douglas MDD 520 Notar Bubble Cover, with special missions equipment.

Section 1: Cockpit/Bubble Covers

The **McDonnell Douglas MDD 520 Notar Bubble Cover** helps reduce damage to the upholstery and avionics caused by excessive heat and can eliminate problems caused by leaking door and window seals. They keep the windshield and window surfaces clean and help prevent vandalism and theft.

The **Bubble Cover** encloses the entire canopy including the windshield, skylights, and chin bubble Attachment buckles are made of nonmetal *Delrin*, designed for rugged outdoor use. Both the top and bottom hems of the cover have a special rope-hem feature with which they can be tightened to help prevent abrasive chafing of the windshield. Pockets are sewn into the cover for the temperature probe and pitot tubes. The bubble cover is reinforced with patches at hinge points, door handles, and for the windshield wipers. For ease of installation, the bubble cover is color-coded (red=left, green=right) with color swatches sewn into the corners.

This cover type is made from Silver Acrylic Sunbrella canvas and is 100% lined with a soft and smooth microfiber. Bruce's Custom Covers developed this material combination especially for aircraft protection. The outer material is medium weight and treated for water resistance, UV resistance and anti-static buildup. The inner lining is a very soft and smooth microfiber to prevent scratching. The material is very reflective, and tests show that the cabin interior temperature can be reduced to near-ambient temperature on the hottest of days. It is water, ice and snow repellent, yet breathable to allow moisture to escape from between the cover and the aircraft surface.

McDonnell Douglas MDD 520 Notar Bubble Cover, with special missions equipment.

MD500C Bubble Cover with Wire Strike detail

Description	Part Number	Price
BUBBLE COVER	520-000	\$1080.00

BUBBLE COVER WITH INTAKE COVER ADD-ON	520-020	\$1100.00
BUBBLE COVER WITH WIRE STRIKE DETAIL & INTAKE COVER ADD-ON	520-021	\$1145.00

Section 2: Engine/Tail Rotor Covers

Blade Tie-Downs are "socks" which fit over the blade tip with or without Blade Covers installed. Front blade tie-downs have two lengths of rope or strap which attaches to the front cross tubes on either side of the cabin. The other tie-downs have generous lengths of rope or strap to tie the blades down at any convenient spot.

Engine Cover details vary by model, but generally these covers are designed to enclose and protect the swash plate, inlet, exhaust and engine access areas. They are designed to tighten up around the main rotor drive shaft and tailboom bottleneck areas, and attach securely with straps either under the belly or to the land gear cross tubes (or both). *Delrin* buckles are used to tighten the attachment straps. The engine cover is made of Solution-Dyed Polyester or acrylic *Sunbrella*, and is available in a variety of colors ([contact us for details]/(contact)). Specific information for each model is available on request.

Rotor Hub Covers overlaps with the Blade Covers to ensure complete protection for the entire main rotor system. Designed like a jacket with sleeves and no collar, the rotor hub cover fastens together below each blade with *Delrin* buckles. The Rotor Hub Cover is normally made from Solution-Dyed Polyester.

Bruce's **McDonnell Douglas MDD 520 Notar Blade Covers** are made of medium-weight Solution-Dyed Polyester and designed to avoid trim tabs or wicks. You can install Blade Covers from the ground with the aid of a lightweight rope attached to the open end. Covers are cinched tight at the blade root with straps and quick-release plastic buckles. The **Cold Weather Blade Covers** are fitted with full-length zippers and optional deice "boots" designed to accept a preheater hose; a small opening at the tip of the cover allows for some air circulation and drainage in freezing weather. Some part numbers have features for an extra charge.

The **McDonnell Douglas MDD 520 Notar Intake Cover**. Details vary by model, but generally helicopter intake covers are designed to enclose the intake area only. They are smaller than helicopter engine covers, and their attachment details can vary from straps, to snaps, or some combination of the two. Specific information for each model is available on request.

Full Cover Set

Description	Part Number	Price
ROTOR HUB/DOGHOUSE COVER (blades removed)	520-100	\$595.00
DOGHOUSE/MAIN INTAKE COVER	520-110	\$570.00
DOGHOUSE/MAIN INTAKE/ENGINE AREA COVER (non a/c models)	520-115	\$605.00
BLADE COVERS (set of 5)	520-300	\$765.00
BLADE COVERS (COLD WEATHER TYPE) (set of 5)	520-310	\$1165.00
ROTOR HUB COVER	520-320	\$375.00
EXHAUST COVER	520-350	\$140.00
BLADE TIE-DOWNS (fabric type) (set of 5)	520-500	\$395.00

Section 4: Tailboom Covers

The **Tailboom Cover** details vary by model, but generally the helicopter tail boom cover encloses the tail boom from the "bottleneck" to the aft end. They usually also cover the horizontal stabilizers, and are custom made to allow for antennae, lights, and other protrusions. They attach with straps underneath the tail boom. Covers for the vertical and horizontal stabilizers are also available separately. Specific information for each model is available on request.

MD520 NOTAR Bubble, Engine, & NOTAR Covers & Blade Tie-downs

Description	Part Number	Price
-------------	-------------	-------

NOTAR THRUSTER COVER	520-200	\$470.00
TAILBOOM COVER	520-210	\$470.00
HORIZONTAL STABILIZER COVER	520-213	\$575.00

Section 5: HeatShields & Sun Reflectors

Cockpit Heatshields are interior sunshades for the aircraft's cockpit. The product is a unique composite of closed-cell foam with a silver mylar finish. The semi-rigid design is stiff enough to stand inside the window framing. Darts and folds are incorporated into the material so that it conforms to the complex shape of the helicopter windows. The set folds up flat and is easily stored in the included storage sleeve. Some designs may require velcro and suction cups. A Heatshield is an excellent short-term remedy for cockpit overheating, but an external fabric cover is more effective for long-term protection.

Description	Part Number	Price
DOOR WINDOW HEATSHIELDS (set of 4)	520-910	\$350.00

Section 6: Miscellaneous Products

****Padded Door Bags*** are designed to provide portable protection of the doors when they are removed from the aircraft. They are padded to moderate thickness, zippered closed, and have sturdy carry handles for easy transport.

Protective Door Bags

Protective Door Bags

Description	Part Number	Price
PROTECTIVE BAGS FOR REMOVABLE AFT DOORS, padded (set of 2)	520-095	\$740.00
PROTECTIVE BAGS FOR REMOVABLE FWD DOORS, padded (set of 2)	520-096	\$740.00

Section 7: Light Weight Products: Travel Covers and FlyAway Covers

The **McDonnell Douglas MDD 520 Notar Lightweight Travel Bubble Cover** is the same design as our standard bubble cover, but the material used is very lightweight and will fold up and store in a smaller space.

Travel Covers are made with Silver Solution-Dyed Polyester fabric and fully lined over the entire cover. The material is lightweight and more compact for easy storage in the aircraft. The polyester material is water resistant, but only intended for occasional use outside. We also have an ultra lightweight material available for fitted hangar dust covers. For daily outdoor use, the non-travel Sunbrella Cover is the best choice.
